PERSONNAL STATEMENT

PhD candidate in Computer Science with a Master's in Health Data Science, specialising in end-to-end ML systems and applied AI. I translate complex problems into scalable, deployable solutions, bridging the gap between research and production. Experienced across machine learning, deep learning and data engineering, with a background spanning healthcare and computational domains. A collaborative communicator who combines analytical rigour with a practical, delivery-focused mindset. Based in London, open to relocation.

EXPERIENCE

PhD Researcher

University of West London/ September 2023 - Present

Conducting a PhD research on NeuroAI (AI & Computational Neuroscience) and the development of advanced Spiking Neural Networks using insights into the cognitive functions emerging from the nervous system.

Graduate Teaching Assistant

University of West London/ September 2023 - Present

Teaching assistant on various module for Bachelor and Master students.
Computer Architecture - Programming (Java, Python) - Computer Systems - Algorithms and Data Types - Information Systems & Databases - Functional Programming - Mobile Web application development -- Computer Architecture - Programming Language Paradigms

Data Scientist

ADLIN Science - INTERNSHIP - February / July 2023

Core Task :

- Creation of an internal package in R and Python for managing data from various sources
- Creation of a data cleaning Application with Shiny, including function to facilitate the cleaning (missing values, summary, all the EDA methods necessary)
- Creation of internal tutorials about the utilisation of R6 object and R6 Object in Shiny
- Creation of internal tutorial for the creation of package in R & Python

Health Data scientist

European Hospital George Pompidou- INTERNSHIP - March / July 2022

Adoption and quality of the data warehouse of the Georges Pompidou European Hospital.
Internship in the HeKa team of the European hospital geroges pompidou under the supervision of Dr Bastien Rance
Core task :

- Creation of an R package for data quality analysis
- Data quality analysis of the medical questionnaires
- Study on the biology data from the data warehouse
- Performance comparison on a NLP program for identifiyng dead people, running on the GPU compared to the CPU
  - Optimisation of the program
  - Translation from a CPU program to a GPU program

Software Developper

GreenVillage - INTERNSHIP - April / June 2019

Core task :

- Creation, Architecture, Administration of the database of the project
- Web data scraping
- Data analysis in R and Python for implementation into a web dashboard
- Creation of a server (where the project will be hosted)
  - Creation of the web dashboard including an interactive map
- Creation of cron task for webdata scraping and data maintenance

EDUCATION

PhD : Computer Science - Artificial Intelligence

Ongoing

University of West London/ September 2023 - Present

Conducting a PhD in Computer science specifically on Artificial Intelligence (NeuroAI, AI & Computational Neuroscience).
Under the supervision of Pr Konstantin Nikolic

Master's Degree : Health Data Science

Université Paris Cité - September 2023 - July 2023

Master's in Health Data Science, specialising in machine learning, deep learning, statistical modeling applied to large-scale healthcare and clinical data, survival analysis, and real-world health data to solve clinical and epidemiological problems.

Bachelor's Degree : Bioinformatics

Université Paris Cité - September 2023 - July 2023

Bachelor's in Bioinformatics with training in programming (C, Python, R), bioinformatics, biostatistics, and analysis of biological and omics data.

SKILLS

Artificial Intelligence

Machine and Deep Learning (R, Python)
Supervised and Unsupervised Data
NLP, Computer Vision
Time-series data
Survival analysis
Neural Network
MLops
Probabilistic & Bayesian Model
ML Frameworks (PyTorch, scikit, Keras, MLFlow)
Statistics & Statistics Inference

Data and Databases

Data engineering
Data science
Data Visualisation
Data Analysis
Shiny/ Streamlit Application
Database (Creation, administration and architecture)
Spatial analysis and geographic information systems

BioInformatics/Biology

Epidemiology
BioInformatics
BioStatistics
Computational Biology
Computational neuroscience

Programming language

Python, R
C, C++, Java
SQL

Languages

French - Native
English - Fluent (C1)
Spanish - B2
